Summary

Results-oriented Frontend Web developer with a passion for continuous learning and collaboration. Dedicated to creating user-friendly and visually appealing websites. Seeking opportunities to connect with like-minded professionals.

Project

Weather App

Frontend

- Developed to show real-time weather on a global basis.
- Implemented using weather Api and geolocation Api to grant access.
- Tech Stack: HTML, CSS, JS, weather API

Password Generator

Frontend

- Developed a robust password generator application
- The application allows users to generate strong, unique passwords with configurable complexity, including options to specify length, include/exclude character types or numbers.
- Tech Stack: HTML, Tailwind CSS, React JS

Pokemon Details

Frontend

- Developed an interactive Pokémon information web app that displays detailed stats using real-time API integration.
- Users can search and explore Pokémon data such as abilities, types, stats, and images in a sleek, responsive UI.
- Tech Stack: HTML, Tailwind CSS, React JS, REST API

Skills

HTML5, CSS, Tailwind CSS, JavaScript, REACT JS , Node JS, Express JS, Mongo DB, GSAP, C Programming
